

GETTING TO THE HEART OF PERMACULTURE DESIGN

28th September - 1st October 2015

Cambridge Sustainability Centre

An exciting course helping food growers, families and community advocates to create sustainable systems that work well, are easy to manage and cost effective.

Participants will gain skills to interpret and put into action a toolkit of Key Ecological Practices to mimic the functioning of healthy natural ecosystems — our models of best practice sustainability.

Course leader: Wendy Seabrook, visiting from Australia
