We live in an oil-dependent world, and we have reached this level of oil dependency in a very short time. We have used up vast reserves of oil in the process, without thinking ahead to times when the supply of oil may not be so plentiful. In this talk, Rob Hopkins will show how the inevitable and profound changes ahead can have a positive outcome, leading to the rebirth of local communities who grow more of their own food, generate their own energy, and use local materials to meet their needs.

Rob Hopkins is the co-founder of Transition Town Totnes and of the Transition Network. He is author of 'The Transition Handbook: from oil dependence to local resilience' and publishes www.transitionculture.org.
